Tristan Neal
Web Developer

Work Experience

2022 - Present
Breezeline | Remote
Web Developer ⬀

- Managed and executed processing of up to 12 JIRA tickets simultaneously, overseeing the implementation of new features, resolution of bugs, and enhancement of error handling processes, resulting in an increase in team efficiency.
- Enhanced production backend performance by optimizing APIs for querying customer data from the database via GraphQL, leading to a reduction in response times.
- Authored comprehensive documentation covering remote Linux environments, CraftCMS configuration, and the integration of dynamic Vue components, resulting in a notable decrease in onboarding times for new team members.
- Played a pivotal role in cross-functional collaboration within development teams, utilizing Git for version control to ensure smooth code integration in different staging environments.

2023
Starboard Cruises | Remote
Front-End Developer ⬀

- Designed a TailwindCSS design approach to enhance user interface on various devices.
- Integrated the EmblaCarousel node package via NPM for dynamic slide carousels in multiple sections and modals.
- Utilized the useRef hook to efficiently navigate users via sectionRefs throughout the single-page application, reducing loading times by 15% and improving overall user experience.

2021
Bandingo | Remote
Front-End Developer ⬀

- Solely managed the end-to-end development process of a progressive web application, resulting in a a reduction in development time and an increase in deployment efficiency.
- Used Netlify serverless functions to seamlessly pass data via remote endpoints and URL query parameters to the frontend client-side application, resulting in an improvement in overall application functionality and user experience.

2020
Freelance | Remote
Front-End Developer ⬀

- Developed responsive website for client maitassanes.com using HTML, CSS, and JavaScript
- Collaborated with graphic designer to create custom background wallpapers for enhanced user experience
- Created custom navbars for improved navigation and user interaction on the website
- Integrated Mailchimp for harvesting user emails for targeted marketing campaigns
- Implemented continuous deployment integration using Netlify and GitHub Actions for seamless updates and maintenance of the website

2020
Nova | Osaka, Japan
English Instructor

- Instructed Japanese citizens as a full-time employee of Nova, a leading private English teaching company (Eikaiwa school), achieving a 95% student satisfaction rate.
- Traveled between the Tennoji, Kita, and Higashinari wards to deliver lessons at six different offices, covering a student base of over 200 individuals.
- Curated comprehensive lesson plans tailored to adults and children across beginner to advanced skill levels, resulting in a 20% increase in student engagement and proficiency.
